

Wheel Chock

PRECISION FABRICATION

Do you ever store or haul your motorcycle? Do you need something that is well built and you can trust will hold your bike without breaking? Tigmaster has the solution for you. Our wheel chocks are constructed of a 3/16 thk. base with 11 gage upright and wheel pivot. All parts are cut on our laser cutter and welding by certified welders. They come with 2 different size wheel pivots to accommodate any bike and are available with many finish options. Some of these options are having them powder coated different colors, zinc coated or complete stainless steel construction. We will even custom cut your name in it. For more information and pricing please contact Jeff Sukupchak @ 269-422-2135 ext. 312

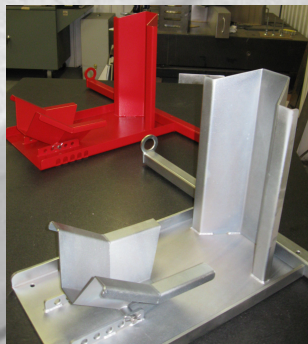

Tigmaster welding also specializes in many other services, some of which are structural fabrication, sheet metal, tool and die welding, spray welding, laser cutting, water-jet cutting, flame cutting, machining and inspection.

For more info please contact a member of our sales team.
